

DOI Work Activity H4: Evaluate Linear Recreation Management Objectives

Program Area:	Recreation
End Outcome Goal:	REO 1 – Improve the Quality and Diversity of Recreation Experiences and Visitor Enjoyment on DOI Lands
Intermediate Outcome:	This activity does not align to an intermediate outcome
DOI Sub process:	1a - Collect data (conduct inventories, surveys, monitoring)

Examples/Notes: The number of miles of rivers, trails, and byways evaluated to determine whether or not specific recreation management objectives are being met. Recreation management objectives are established in resource management plans, plan amendments, and/or recreation activity plans. Evaluations may be triggered by specific time periods identified within the planning document, by reaching established thresholds of a resource or social indicator, or by a management decision to determine if recreation management objectives are still valid within any recreation site or area. The evaluations would relate to objectives concerning physical, social, managerial settings and/or resource conditions. Evaluations are documented and recommendations made, resulting either in a continuation or a change in management prescriptions or practices.

Work Activity Description: Rivers (eligible and suitable prior to designation), trails, and/or byways management objectives that are evaluated in a given year. Costs can include monitoring data collection, data evaluation, permanent documentation, and reporting. Work can be reported in absence of a management plan, if the evaluation is done pursuant to a decision

This work does not include base line data collection and assessments for congressionally designated Wild And Scenic Rivers and National Scenic And Historic Trail Or Recreation Areas.

Output: Miles evaluated	Unit of Measure: Report miles to the nearest whole mile based on field observations made, data collected and completed reports.
Inputs: Report all procurement and labor costs of baseline data collection and assessments associated with rivers (including eligible and suitable wild and scenic rivers prior to designation), trails, and byway work. The work includes baseline inventory and assessment of rivers and trails that are being evaluated for potential congressional designation. Social and economic baseline collection or studies and visitor/resident customer assessment associated with rivers, trails, and byways are appropriate costs for this program element.	Cost Drivers:
